

CHEMATIX™

Comprehensive Chemical Management System

Procurement & Chemical Store

The CHEMATIX™ Procurement Module divided to two separate functionality areas:
Web Procurement and **Chemical Store/ Stockroom Management**

The most innovative feature of CHEMATIX™ is the ability to procure scientific chemicals and supplies via the web, from virtually any web-enabled device anywhere in the world. Search inventories and catalogs, order supplies, manage existing orders and generate a variety of reports in this powerful module.

Some of the highlights include:

Ability of laboratory personnel to conduct a web search of chemicals in chemical store/warehouse inventories, surplus inventories and on-line catalogues of affiliated vendors according to item description, catalog number or CAS number

Capacity to view item description, unit pricing, catalog number, CAS number and SDS from on-line search of chemicals and supplies

Ability to integrate with institutional purchasing and transfer (or receive) order's data and fulfillment.

One click addition of selected items to build market basket from on-line supplier catalogues or university stores.

- Ability to quickly add items to market basket from "Hot List", an intuitive order profile configurable according to specific business requirements
- Special order capability, allowing procurement of chemicals and supplies from virtually any approved vendor
- Capability to transmit special order items, non-stock items, and inventory replenishment orders by xCBL directly to contract suppliers
- Optional generation of alerts to Environmental Safety personnel for purchase of extremely hazardous chemicals
